Water and sand casting course

By Francesco Coda

(Fri 17:00-20:00, Sat and Sun 10:00-13:00, 14:00-17:00)

(350€ +22% VAT)

The focus of this course is the realization and the execution of micro fusion techniques.

Fire, water and soil are the elements and the instruments required to construct simple and complex forms, as well as to reproduce objects and transform them into new creations.

Program:

Construction of the necessary equipment in order to realize fusions with either soil or water.

Introduction to different silver, copper and gold alloys including schibuichi and shakudo

Experimenting different types of direct metal castings with stones.

Finishing of one or more pieces.

We do not provide the precious metals used during the course.
