

FIFTH EDITION OF TRESORS, EXHIBITION OF CATALAN CONTEMPORARY JEWELRY.

Popular culture is the whole of cultural manifestations produced or consumed by the popular classes. It includes traditions, songs, legends, superstitions... Traditionally, it is transmitted orally, but since the arrival of the Internet and new media, these have become very important transmitters of popular culture.

Popular culture is also considered one of the distinguishing factors of a nation's identity, because it includes the cultural values, traditions, beliefs and customs that express the uniqueness of the people that build a country.

On the other hand, Folklore is the expression of a people's culture: crafts, dances, festivals, customs, traditions, tales, oral history, legends, music, superstitions, etc., all common to a particular population.

So this year, TRESORS talks about popular culture, folklore, traditions, stories and legends... And it is well known that "whoever loses their origins, loses their identity".
